

MORE ENERGY FOR YOUR FUTURE

We are an innovative company in the wind energy sector headquartered in Neunkirchen/Saar where we currently employ over 170 staff. We develop, produce and sell wind turbines that are enjoying high growth rates in international markets due to their technological edge. **To meet the ever rising demand for our products at our location in Neunkirchen, we are looking for a:**

Site Manager / Supervisor for Wind Turbines

(m/f/d)

Job description:

- Coordination and supervision of the construction sites for wind turbines from the planning process to official approval
- Management and control of the internal and external construction teams
- Ensuring that the construction site is run efficiently through coordination of material supplies and workforce management
- Technical documentation of the construction process and the assembly work
- Supervision of the elimination of defects and preparation of technical solutions
- Ensuring that legal obligations are carried out, complied with and checked

We offer:

- An interesting and multifaceted field of activity in a motivated and professional team
- Employee training schemes as an integral part of our corporate culture
- Fair remuneration and voluntary social benefits
- Flexible working hours

Your profile:

- You have successfully completed a technical training course and ideally possess an additional qualification as a technician or higher (equivalent to a German "Meister") (m/f/d)
- You have several years' work experience in construction management
- You are a team player who has excellent organizational and communication skills and who is good at resolving conflicts and making decisions
- You are prepared to travel and assemble facilities for national and international projects
- You have a good command of MS Office and good language skills in English
